

Smile Makeover by Dr. Fitzgerald

Lee Fitzgerald D.D.S., F.A.C.D.

FACTS:

- Most memorable quality - A Smile
- Confidence - A Smile
- What tells a person's health - A Smile
- Indicator of success - A Smile
- What can say you - A Smile

A smile tells more about you than you know. It says who you are to others. Dallas is an active community and we all want to make our best impression. A smile says "I care about myself", "I am happy", "My life has meaning" and "I am confident"

Finding the right Cosmetic Dentist to give you the healthy and beautiful smile you want can be a difficult decision but it is one of the most important decisions you will ever make. It is Dr. Fitzgerald's goal to help you make the right choice.

Dr. Fitzgerald and his staff welcome you to their office for a complimentary exam and consultation.

A Healthy Smile Adds Years to Your Life and Life to Your Years

-Dr. Lee Fitzgerald

Cosmetic Dentistry is now recognized as a specialty by the American Dental Association (ADA)

MY SMILE

Dallas Smile Expert - Dr. Lee Fitzgerald

A smile tells more about you than you know. It says who you are to others. Dallas is an active community and we all want to make our best impression. A smile says "I care about myself", "I am happy", "My life has meaning", "I am confident" and "Good health is important to me"

The 4 Keys to a beautiful smile

The keys are in order of importance and you must have all of these right to have a beautiful smile. 1. Attractive tooth color or whiteness 2. Correct tooth shape 3. Appropriate position of teeth 4. Gum health and 5. Ideal gum height. These same rules of cosmetics apply to porcelain veneers, crowns and dental implants.

The Smile Makeover Process

Most people know when they need to improve their smile, what keeps them from pursuing their dream is not knowing how to get the smile they want. We make the process very predictable. First is the initial consultation where we address your concerns and then we determine how to improve your smile. Next photographs and models of the mouth are made for a prototype smile for you to wear while your new smile is being created. You then test drive the new smile and tell us what you think. We make your final smile from the approval you give to the prototype smile. You will also meet with our ceramist to determine the color and character of your new smile.

In-Office Cosmetic Dental Laboratory

It is very important to make the smile the correct color and whiteness. The most important factor other than your cosmetic dentist is the laboratory. Dr. Fitzgerald's office is one of the few in the country that has an in-office cosmetic dental laboratory. We are 1 out of 12 laboratories in the country where both dental and ceramist are members of the American Academy of Cosmetic Dentistry and are under the same roof. Both expertly trained by some of world's greatest masters.

Dr. Fitzgerald's Expertise:

Porcelain Veneers

Veneers are used to correct the color, shape and alignment of teeth by adding porcelain to the front of the teeth. Dr. Fitzgerald is one of the first cosmetic dentists in Dallas to do porcelain veneers.

Crown-Lengthening Gum Re-contouring

Combining art and skill to reshape the gums. Short teeth can be made to look longer and uneven gums are aligned. This is a simple one visit procedure.

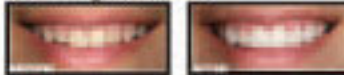

Porcelain Crowns

When teeth need to be fully restored and can no longer hold a filling material or the life needs to be extended, crowns are used. Crowns look like natural teeth, they completely cover the top of the tooth. Crowns correct the color, size and bite surfaces of the tooth.

Health Restoration

Smile makeovers may require treating more than just the front teeth. It depends upon how broad your smile and the condition of your back teeth. The advantages are the smile can be made better and reinforce the cosmetic result.

Gum Reshaping and Porcelain Veneers

Mock Smiles using Dental Implants and Crowns

Porcelain Teeth
